

LNGnet Technical Assistance

Sergio Ascari, FSR Professor & Key Expert 2

Funded by
the European Union

The LNGnet Project

Technical Assistance

- In cases assessed as particularly relevant and feasible within the timeframe and capabilities of the project, LNGnet will provide Technical Assistance to countries requiring additional support in developing their domestic natural gas market or connecting to the LNG world market
- Technical Assistance by the Project will be free of charge for beneficiaries
- Examples of issues that may be addressed:
 - Analysis of costs and benefits of developing a domestic gas market
 - Analysis of market design and regulatory options
 - Analysis of costs and benefits of developing LNG imports and related solutions
 - Development of renewable and decarbonised gases
 - Ways of reducing gas industry greenhouse gases emissions

The LNGnet Project

Technical Assistance

- Technical Assistance (TA) action will comprise the following:
 - Case identification, including cooperation opportunities and obstacles
 - Approaching and meeting with stakeholders of the countries
 - Specific training activities
 - Specific analysis of issues
 - Producing technical assistance reports, including specific policy recommendations
- **Course participants are warmly invited to submit proposals for TA action, within LNGnet activity scope**

Thank you!
